HOLE OF THE MONTH

HOLE 8 - PAR 5

A true bombers dream, this downhill par 5 sets up best for the draw hitter. Make your target the water tower to hit the "speed slot" and leave yourself a mid to long iron second shot.

April gave us a little bit of everything, cool mornings, warm afternoons and several rain events that helped recharge soil moisture heading into the busy season. We will be applying our summer fertilizer to all the tees and fairways. This application promotes strong growth, improved color and better turf density as we head into peak play and summer stress periods. Our team continues to stay focused on building healthy turf for the months ahead which includes dialing in irrigation, applying protectants as needed and monitoring soil moisture. We will continue manicuring the turf regularly to provide the best possibly playing conditions. See you on the course!

ON THE RANGE

by Austin Fickel, Head Golf Professional

FIGHTING THE FADE?!

You're stripping it... the swing feels pure... the contact sounds decent... yet the ball still peels off like it's late for another fairway.

Before you blame your clubs, your alignment, the wind, Mercury being in retrograde, or your buddy Dave whispering "nice swing" during your backswing... check your grip pressure.

A lot of golfers turn the club into a stress ball, especially with the trailing hand (right hand for righties, left for lefties). Death-gripping the club can keep the face from squaring up through impact.

Try this instead:

- Lighten the grip pressure
- Let that trailing hand feel like it's just a passenger
- Then let it wake up right before impact for that little POP through the ball

You might just find that sweet, satisfying clubface square-up we all chase like it's buried treasure.

Because sometimes the difference between a power fade and a "FORE RIGHT!" is just relaxing your hands a little.

A MESSAGE FROM YOUR GOLF PRO

PLEASE REPAIR DIVOTS

Ball Mark Repair Tips USGA

A ball mark repair tool is recommended, but other pointed devices can be used.

PUSH, DON'T PRY
Starting from the back and sides, gently push and stretch the turf to the center of the mark.

WORK AROUND
Work around the ball mark until it's filled in. Avoid lifting and twisting the turf harshly.

FINAL TOUCH
Use your putter to lightly tap down the mark. Fix other marks to keep putting greens at their best.
